Client

- Hull Esteem Consortium

Highlights

- The school building, designed by Alford Hall Monaghan Morris, won a Royal Institute of British Architects (RIBA) Yorkshire award and a RIBA National Award.

Location

- North East and Cumbria

Project Description

Hull's Kingswood Academy offers state-of-the-art facilities complemented by bold architectural design that has earned both regional and national awards.

Built to replace previous facilities constructed in the 1990s, the new facility is a flagship project as part of Hull City Council's £400 million Building Schools for the Future (BSF) programme.

The four-storey academy includes media facilities, a recording studio and industry-standard areas for science, fine art and technology. To encourage interaction with the local community, several of the school's facilities are made available for public use. These include a learning centre, sports hall, floodlit synthetic turf football pitch, and a high quality performing arts theatre which features its own dedicated 'plaza' entrance and box office.

Responsible business

Planet

The building received a BREEAM Very Good rating in recognition of its environmental credentials, in addition to a 'Performance Beyond Compliance' certificate as part of the Considerate Constructors Scheme.

Partners

Morgan Sindall Investments Limited

Awards

RIBA Yorkshire Award
2013

RIBA National Award
2013

Project key facts

The new buildings have increased the school's capacity from 1,200 to 1,350.
